Environment Setup & Execution Guide

Codenza Development Team

Fall 2017

Introduction

A Coding Reference Application for Programmers

Love our App and starting to code in a new programming language, but confused how to proceed or how to run a program of a specific language? No worries, we've got you covered up there too. This guide will help you to setup and configure your computer/environment to run programs provided in our application.

Programming Languages Covered: C, C++, C#, Java, Python, PHP, Perl.

Note: You can use older OS's but it is preferable to be using the Newer Versions. This guide has been carefully prepared keeping in mind the need of both Novice and Experienced Programmers alike. Hence it has been divided into two sections as follows.
